

DIEGO DIAZ

Lead Programmer building a student submission platform that improves editorial intake accuracy and accessibility and lets nontechnical editors manage routing through Google Sheets. Builds front-end interfaces with accessibility-focused design and adds real-time syncing plus automated Outlook routing to cut manual steps. Seeking full-stack roles to expand backend experience and deploy scalable websites.

EMPLOYMENT HISTORY

LEAD PROGRAMMER

Elon University

Feb 2026 – Apr 2026

Elon College, NC

- ♦ Serve as the sole developer for a long-term submission platform designed to streamline how students submit opinion articles and how editors manage incoming pieces.
- ♦ Building the system using HTML, CSS, JavaScript, and HCI-focused design principles to ensure clarity and accessibility for all users.
- ♦ Backend integrates Google Sheets and Google Apps Script, allowing editors to update routing information without modifying code.
- ♦ Website automatically syncs changes in real time.
- ♦ Implementing Microsoft Power Automate to send submissions through ENN's official Outlook accounts, ensuring the platform remains maintainable and campus-supported after graduation.
- ♦ Led single-person development of submission platform using HTML, CSS, JavaScript to improve editor intake accuracy.
- ♦ Implemented real-time sync between site and Google Sheets so editors saw routing changes instantly.
- ♦ Wrote clear deployment and maintenance notes enabling nontechnical editors to update routing without code changes.

STUDENT WORKER

Elon University

Sep 2023 – Present

Elon College, NC

- ♦ Support campus-wide financial and administrative operations by assisting with fund allocation, procurement coordination, and internal communication across departments.
- ♦ Work with Risk Management to ensure the operational readiness of all 36 Automated External Defibrillators (AEDs) on campus through regular inspections, documentation, and maintenance reporting.
- ♦ Strengthened organizational skills, attention to detail, and ability to manage responsibilities that directly support university safety and operational efficiency.
- ♦ Conducted monthly AED inspections, logged maintenance in Excel, and flagged service needs to Risk Management.
- ♦ Prepared weekly procurement status reports in Microsoft Excel for supervisors to track outstanding orders and deliveries.
- ♦ Managed campus purchase orders and vendor invoices in Banner, reducing processing delays for departments.

TEAM MEMBER

Cicis Pizza

Apr 2023 – Sep 2023

Burlington, NC

- ♦ Provided customer service and maintained a clean, organized dining environment in a fast-paced setting.
- ♦ Prepared menu items, restocked buffet stations, and ensured food quality and presentation met company standards.
- ♦ Collaborated with team members during high-volume periods to support efficient operations and a positive customer experience.
- ♦ Restocked buffet stations multiple times per shift to keep offerings fresh and minimize customer shortages.
- ♦ Cleaned and sanitized dining and service areas on schedule, improving cleanliness for walk-in patrons.
- ♦ Trained new hires on buffet rotation and food-handling routines to speed onboarding during busy weekends.

EDUCATION

COMPUTER SCIENCE

Elon University

Aug 2023 – Jun 2027

Elon, NC

- ♦ Dean's List.
- ♦ Relevant coursework includes Data Structures, Algorithms, Programming Languages, Statistics, and Web Development.
- ♦ Active member of the German Club, developing intermediate proficiency in German alongside native Spanish fluency.

GED
Hugh M Cummings High School

Aug 2019 – Jun 2023
Burlington, NC

- ♦ National Honor Society member with volunteer experience supporting students with special needs, assisting families with financial challenges, and providing Spanish-English translation services.
